MANTELS & TIMBER ACCENTS

Home is where the hearth is. Warmth gives life. Adorn your fireplace - the focal point and metaphorical heart of the home.

An extension of the indoor living space. An oasis. A home away from home. The spot to unwind and to entertain the masses. All-in-one. The patio can often times be underappreciated if hastily established

TIMBER FRAMED PATIOS

during the design phase. In some climates, the satisfaction can be amplified many fold just by covering it. We specialize in realizing and crafting a patio cover that seamlessly reflects your home style.

01

OUTDOOR ENTERTAINING HAS NEVER
BEEN SO APPEALING

ARTISTIC PATIOS

01

Zen like state.

This patio cover is nuanced yet refined. The result is a bold piece that is unassuming and zen like structure that compliments nearly any contemporary abode.

Layered shading.

The trellis is designed in a purposeful order and pattern. There is a clear hierarchy established with ascending layers of crossing timbers that strikes an energetic balance.

02

02

01

RUSTIC PATIOS

01

Go big (right at home).

Inspiration for this patio come from early western vernacular.

02

Four seasons of rustic outdoor living.

Stout posts carry this rustic patio adorned heavily in stone and perfectly frame the fireplace for cozy evenings in the back yard.

01

LESS IS MORE

MINIMALIST LIVING

01

Sometimes, less is more.

Clean and simple aesthetics lend well to straightforward living and pure timber elements. Humble, refined materials give this patio a distinctive, no-frills look that is sure to please those who prefer an unfettered home.

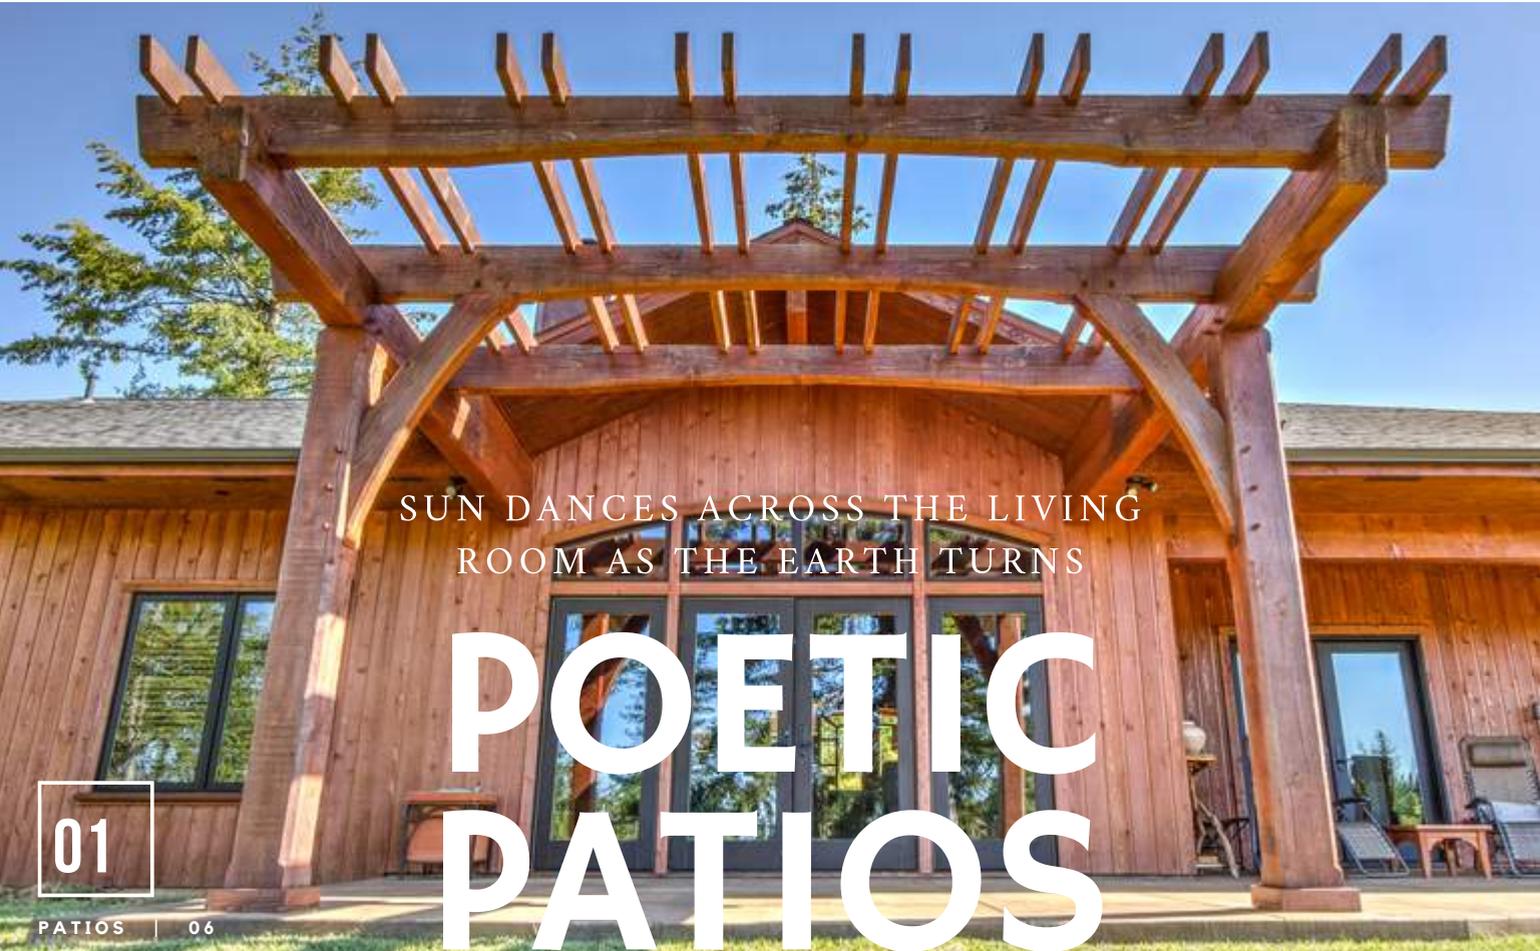

Dances with Sun.

The eclectic nature of this home created an opportunity for an unorthodox patio adornment. The arbor like structure defines the space and creates a dazzling filtered light effect as the sun moves across the sky.

01

01

TRANSITIONAL TOUCHES
THAT TRANSCEND TIME

ELEGANT PATIOS

01

What's old is new again.

Fond of tradition and the comfort of familiar forms?

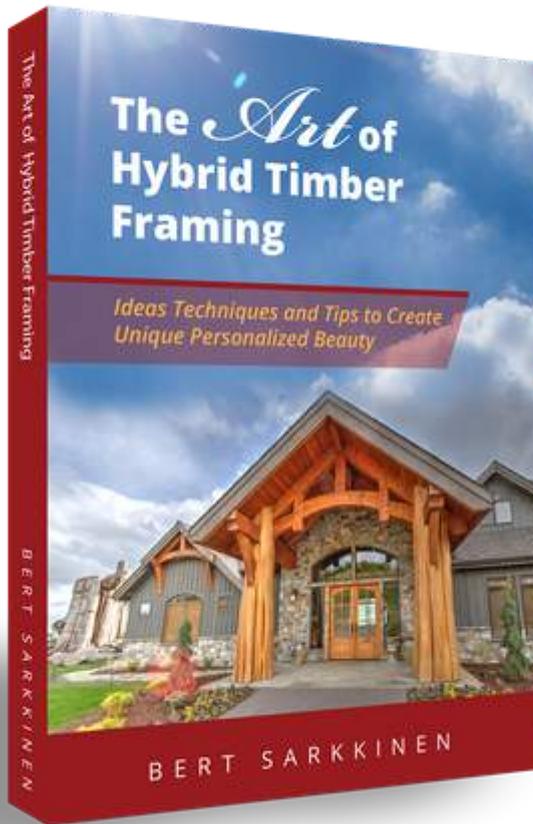

This patio blends the precedent setting shapes of early timber framing with contemporary materials and elements for modern comfort without compromise.

01

FINALLY! UNIQUE TIMBER DESIGN

FOR REMODELS, BUILDING PROJECTS AND INTERIOR DESIGN

You will learn how to avoid expensive pitfalls and understand the diverse timber styles showcased in this book.

This will help you better communicate your ideas, achieve an enjoyable building process, and maximize your probabilities of success using hybrid timber framing.

picturesque pavilions

01 Weathered and ready for anything.

Situated in the rainy coastal PNW, this pavilion provides refuge from the elements and allows for the opportunity to enjoy the outdoors year-round.

remarkable, intimate standalone structures that leave a lasting impression

01

01

SHOWSTOPPING PAVILIONS

01

Steal the show.
This pavilion is meant to be the center of attention. The large truss spans the length to provide a viewing portal to allow an audience unobstructed views of performances on this inviting stage.

01

Striking approach.

This pavilion is built on a floating dock in the heart of a Washington vineyard. The six sided structure with classic knee braces help frame the views of the property from it's unique vantage.

TIMBER FRAME ENTRIES

No feature has more impact to the character and feel of a home as the area around the front door. This region of the facade defines the essence of the home's style. A properly delineated entry sets off a cascading effect that gives meaning to the aesthetic intent of the house. The timber entry truly is the face of the home.

MODERN APPROACH

FUNCTIONAL AND PRACTICAL TIMBER
DESIGN FOR A MODERN LIFESTYLE

01 Timeless mid-century modern charm.

Taking cues from Eichler and Cliff May, this sturdy modern entry marries the sleek aesthetic of yesteryear with stout timbers and contemporary materials.

Sharp and angular.

Vertical emphasis and a dramatic reverse shed roof over the entry give this home's facade a lot of energy

02

MAKE A POWERFUL
OPENING STATEMENT

01

RUGGED ENTRIES

02

01

Dramatic entrance.

Exposed concrete, weathered steel brackets, and big angular timbers combine to produce a remarkable entry that doesn't apologize about its uncontrived raw materials.

02

Western influence.

Organic materials and hierarchy that are consistent with traditional western architecture are framed by this beefy timber entry.

01

01 Standing tall.

Massive tree trunks summon a Pavlovian sense of security and strength. This covered entry will feel like a gate to a sanctuary on approach.

02 Husky geometric shapes.

Hefty scissor trusses create extra clearance to create a flexible carport that can be converted to a dynamic entertaining space that is safe from the elements.

GRACEFUL FACADE

01

ELEGANT ENTRY

01

Effortless beauty

Fond of tradition and the comfort of familiar forms?

This patio blends the precedent setting shapes of early timber framing with contemporary materials and elements for modern comfort without compromise.

01

CLASSIC MOTIF

ICONIC TIMBER ELEMENTS

01

Dignified timber frame

Heavy tapered posts add visual weight to the entry while ornate details in the knee braces and sub bottom chords complete the elegant look.

01

01 Pure and simple.

Uncomplicated and to the point. Crucial structural elements with straight lines are the underlying principles of the traditional style timber framed entry.

02 Harmony and balance with unpretentious forms.

Plain chamfering touches and predictable angles create a foundational canvas for straightforward beauty.

TRADITIONAL PERSPECTIVE

02

European Elegance

TIMELESS DESIGN & METHODOLOGY

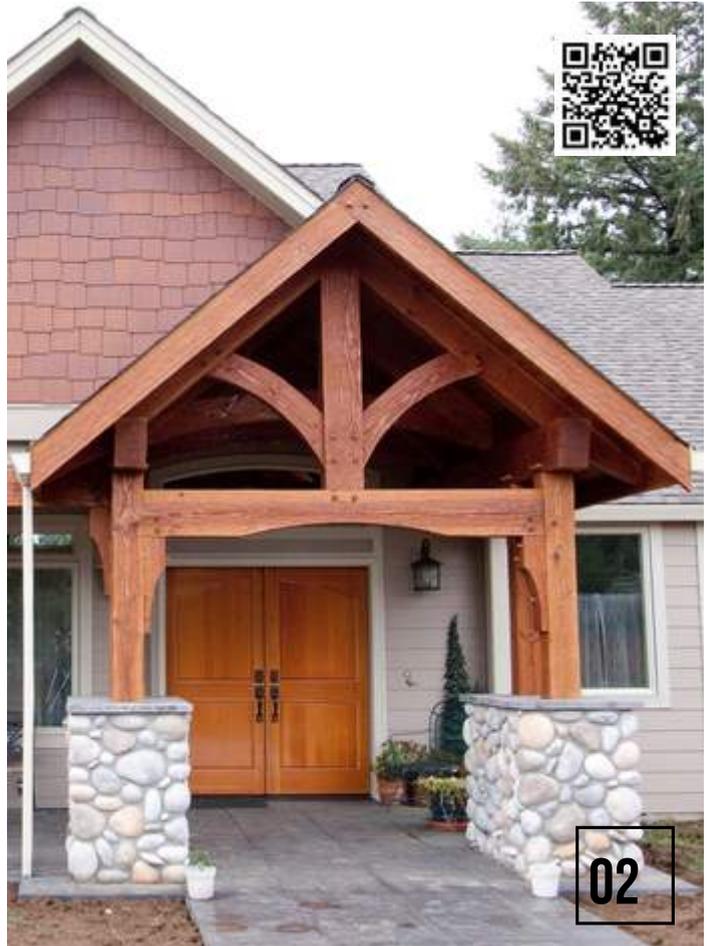

01

01

Drawing from the past.

Inspiration for this entry has come from early European vernacular. Rich stain add a lush personality to the wood.

02

02

Effortless grandeur.

The almost cramped timber density and starkly curved webs evoke a modicum of opulence that denotes a Euro-style entry.

THE LIVING ROOM

The workhorse. Jack of all trades. The room to be all rooms. This space has you covered. Living, dining, entertaining, studying and relaxing. Whether you're enjoying a warm cup of a coffee on a Saturday morning or catching up with the world with some evening television, the living room has to fit your lifestyle perfectly to be that space that serves your needs.

01

Everything in it's right place.

Finding order in such a large space can be a challenge. This open concept living room strikes the perfect balance with proportional timber elements that open the space up

01

01

RUSTIC LIVING ROOM

01

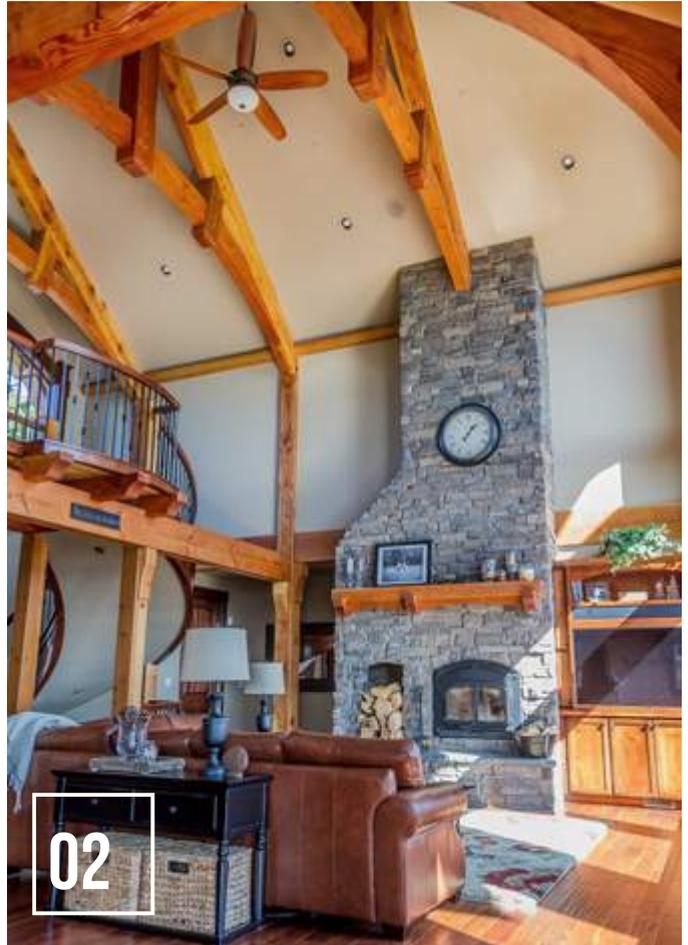

"I want it big."

Strong arched trusses define a rustic den space. For those who like a lodge type feel, we find that bigger is usually better. Hand hewn timbers and tons of natural attitude can be found in this space.

01

02

GRACEFUL INTERIOR ELEMENTS

Classic Arched Trusses

01

Framed views.

This dining area is well defined with an elaborate rafter system coming to a point above the room that is formed by the truss.

02

Turn up the volume.

Vaulted two story spaces can feel tall and empty. The right truss and timber density can bring that ratio back into balance as seen in this beautiful room.

01

A bold combination.

Wood and metal are united in a distinctive manner in this room. The roof is held with a modified queen truss that is half timber and half steel to create a strong industrial aesthetic.

RUSTIC INDUSTRIAL

METAL AND TIMBERS JOIN TO CREATE ENERGETIC SPACES

SLEEK OPEN CONCEPTS

FUNCTIONAL AND PRACTICAL TIMBER
DESIGN FOR A MODERN LIFESTYLE

01

Contemporary timber living.

This stylish new home focuses on efficiency as much as it does beauty. The main space is completely open, but the timbers help establish the rooms without impeding circulation.

01

CRAFTSMAN GREAT ROOM

01

A great room worthy of a parade.

This award winning home features a unique queen style truss that gives the room a gorgeous vaulted space to take advantage of the low pitch.

01

R O B U S T

01

02

01

Sophisticated and dynamic design.

These trusses perfectly echo the curvature of the windows engendering continuity and flow in the vaulted room.

02

Defining line.

Embracing posts can sometimes make the space even more vibrant. The transition from one room to another feels significant and purposeful in this application

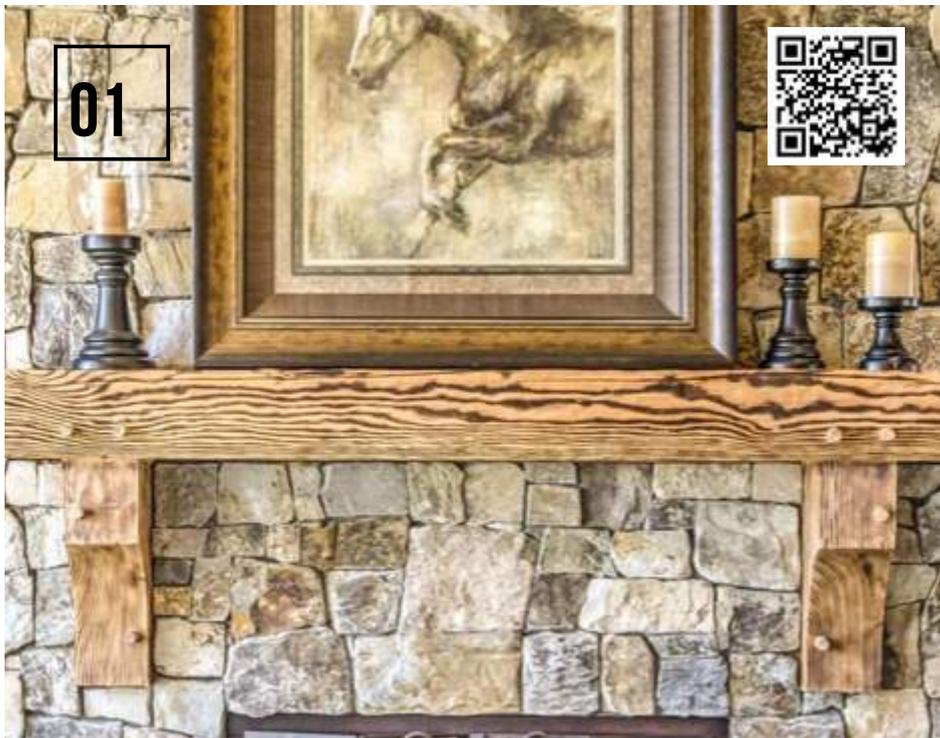

02

THE TIMBER MANTEL

Home is where the hearth is. Warmth gives life. Adorn your fireplace - the focal point and metaphorical heart of the home. The center of attention. The main living room has long revolved around this heat source. The primal design element has endured centuries of home design. Though less essential as a life giving active system, the charm and tradition lives on.

ROBUST MANTELS

03

BASTION LIKE STABILITY AND
COMFORT AROUND THE HEARTH

01

Shou Sugi Ban.

This dramatic mantel is created with a fascinating process - the wood is burned before it is brushed leaving a high contrast effect in the grain.

02

Unambiguous decor.

Ornamental metal straps tie this unfettered mantel to its natural surroundings.

03

Big fireplace. Big mantel.

Proportions are crucial in good design. Relative size and scale between elements has to strike a perfect balance to feel right. The relationship of this mantel to it's host space provided a unique opportunity to create a truly unique mantel.

01

02

03

01

Fork and tongue.

Arts and crafts style joinery mingle with an elegant copper flume that extends from the stone base. Cozy meals and evenings spent around this gem are always sweet.

03

Striking yet graceful.

The colorful tiles are made even more vivid due to their vertical alignment and blend with the upright energy of the polished timber mantel.

THE MANTEL IS A
SIMPLE STATEMENT
OF THE SUM OF
THE HOMES
INDIVIDUAL PARTS

02

Humble adornment.

A natural unassuming approach can create the greatest effect of all.

EXPRESSIVE MANTELS

While designing a hybrid timber home, the question of how prevalent should timber elements be showcased, can effect the curb appeal and assist in setting the tone for how your home will feel. It is important to consider overall ratios and proportions. We have many solutions to carry a theme from one area to another to the desired effect.

DECORATIVE TIMBER ACCENTS

01 **Less is more.**

Subtle tapers and clean lines compliment the striking form of this transitional home. This abode speaks volumes by sticking to unassuming and simple forms while letting the refined materials stand out.

02 **Tone setter.**

Directly above the main entry truss, the main dormer felt out of place and distracted the eye. The addition of the this accent truss tied the whole concept together.

03

Small, but mighty.

This corbel bracket is one among a few like it that help tell a bigger story. The collective of these around the main gable amplify the theme of the main timber design element.

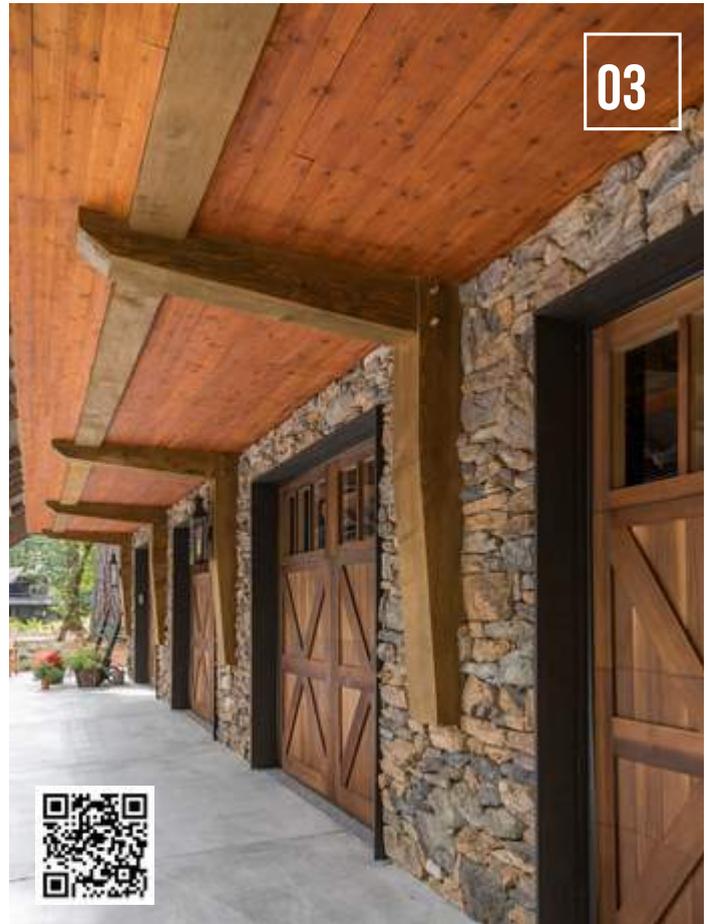

01 Reclaimed character.
Hefty pieces of reclaimed wood establish an equilibrium against the weight of the stone accent wall behind. This accent ties numerous themes together while looking great all by itself.

02 No overhang? No problem!
This dormer is a great example of how a timber corbel accent can create a lot of character without much space to work with. The simple shape still echos the silhouette of the major design elements.

03 Pattern language.
Dominant repeating themes can create a comforting sense of continuity without designing a form that is too conspicuous. These timber corbel elements demonstrate how to simply break up monotonous surfaces and create intriguing texture without going over the top.

01

01

The one-two punch.

Sometimes the best way to tie a theme together is to incorporate a few decorative element in one unit. This truss mimics the design of the main entry truss and the sits on brackets that help make it feel more substantial to help the overall massing feel proportional.

02

02

Fill the void.

The corbels add visual interest in the gable and reflect a pattern that is seen elsewhere on the house to add a uniform aesthetic. Shed roofs supported by corbel brackets help a stale area become more engaging.

AWARD WINNING TIMBER DESIGN
